

## 10-minute PEPPERMINT SOAP

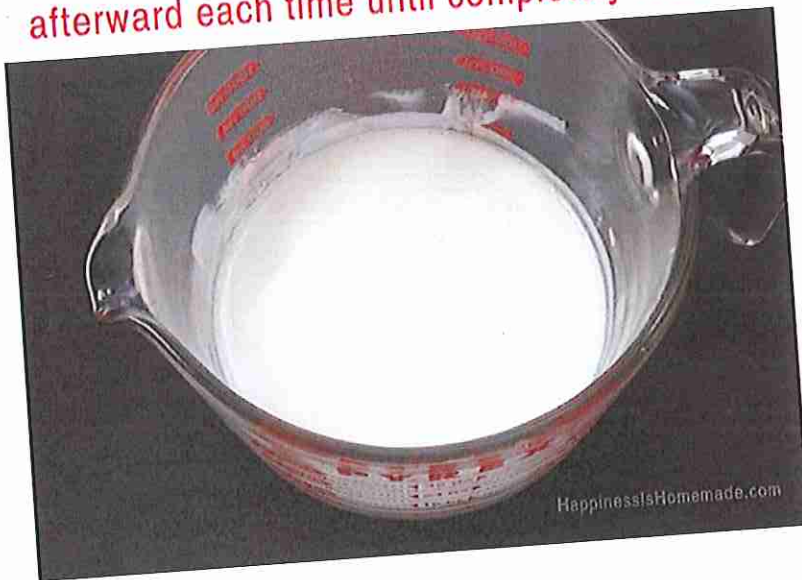

## 10-MINUTE DIY PEPPERMINT SOAP

### What You'll Need:

- Shea Butter Soap Base
- [Peppermint Essential Oil](#)
- [Red Soap Colorant](#)
- [Soap Mold](#)
- Microwave Safe Measuring Cup w/ Spout
- Toothpick

Microwave in 30 second increments, stirring afterward each time until completely melted

The large block of shea butter soap base is smooth and silky, and it cuts easily with a kitchen knife. Slice the soap base into cubes, place them inside the measuring cup, and melt in the microwave in 30-second increments. Stir well after each microwave session to ensure that the soap is completely melted. Add a few drops of peppermint oil (around 6-10 drops depending on the intensity of the fragrance) and mix well.

Note: To make three peppermint soap bars, I used just over 1/2 lb of soap base, and it took a total of 60 seconds in the microwave to melt. The soap cools and sets up rather quickly, so work accordingly!]

Pour the melted soap into the mold and top with a few drops of red soap colorant. Use a toothpick to swirl the white and red colors together and allow to cool completely before removing the soap from the mold.

Wrap a band of paper or ribbon around the stack of soap, and it's ready for gifting!
